Myjive Internship Program

REQUIREMENTS

All applicants are required to send a URL of their portfolio website (which should include examples of work) along with their resume.

We do not accept links to PDF's, blogs with ready-made templates, or Myspace profiles pages. Although an occasionally print portfolio will knock our socks off, Myjive is an interactive design firm and thus **REQUIRES** all applicants to have a web-version of their portfolio -- proving a basic knowledge of web design practices. Your website must be a unique design built using HTML and/or Flash.

ABOUT MYJIVE

Myjive is an interactive experience agency powered by form, function and a desire to push the limits of technology through continued innovation. Our clients come to us with a desire to accomplish great digital firsts and position themselves as leaders in the interactive space.

Myjive provides creative solutions that drive our client's business through the efficient and effective use of technology. Understanding the user experience and interaction with the brand, product, interface and communication tools provides us with the roadmap for the best digital solution and interactive firsts that continue to evolve and improve the technology industry. Amongst all of that, our "jive" offers a casual work environment, play-time with the Nintendo Wii, unlimited vanilla nut coffee, donuts, and air conditioning.
